Detailed Action

Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to the independent claim 1, prior art fails to disclose or make obvious, in addition to the accompanying features of the claim, a sample-stage for a scanning electron microscope comprising a collimator with an aperture, horizontal and vertical support members, and a first and second reflector made of high atomic number material, where the top surface of the vertical support member abuts the left end and bottom surface of the horizontal support member so that a portion of the right surface of the vertical support member is directly below the first aperture of the horizontal support member, so that the right surface of the vertical support member is at a user-definable angle as compared to the left side of the vertical support member.

The dependent claims 2-10 are allowable by virtue of their dependence upon the independent claim 1.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. D.B. O'Hara (5,768,339) discloses a collimator with an aperture and two reflectors of high atomic number material.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
